

THE VALUE OF CHOICE

We are a school that believes in the value of choice. 50 years ago a group of Lutheran leaders chose to open a place of learning encompassing academic excellence, spiritual depth and moral integrity. Today their success is seen throughout the community as former students lead us. It is seen in the strength of our students now competing in high schools and colleges. We see the value of good choices everyday in our hallways, classrooms, playgrounds and through the achievements of our students.
